Social/Emotional

The kids will be learning about lambs, bears, and ladybugs! This is during their ‘circle time’ where they are exercising their critical thinking. The children will be asked questions about what they have learned so they retain it better. They will also be asked open ended questions.

Another topic they will be learning about is sharing, whether that be in the classroom or at home. They will understand the meaning of taking turns with different table top toys or ones outside.

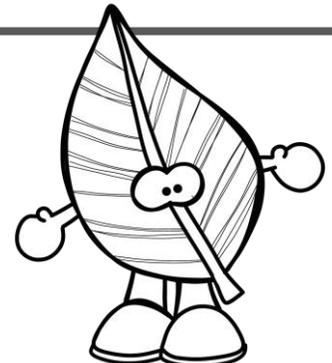

Physical

The kids are really enjoying the different kinds of STEAM toys that are brought into the classroom. This week they will be creating a “rollercoaster.” They will need to create a path where the object will land in the proper hole.

Social/Emotional

Goals for the week:

- to teach the importance of listening and following directions
- to praise each child for something he or she accomplished during the week

The kids approve their ability to understand by going off of the responses of their teacher and their friends. The teachers make it an effort to always praise them in every little job that they do. While observing this, the child is more likely to respond in the same positive way to their peers and others.
