2

Scenario

Quarantine recommendations for: **unvaccinated close contacts** who were not wearing masks or for whom the infected individual was not wearing a mask during the indoor exposure; or unvaccinated students as described in #1 above.

Action

For these contacts, those who remain asymptomatic, meaning they have NOT had any symptoms, may discontinue self-quarantine under the following criteria:

Criteria

1. Quarantine can end after Day 10 from the date of last exposure without testing; OR
2. Quarantine can end after Day 7 if a diagnostic specimen*** is collected after Day 5 from the date of last exposure and tests negative.

*Adapted from the [CDC K-12 guidance](#) and [CDC definition of a close contact](#). If exposure occurs outside of the school setting this guidance does not apply, and the Community Health Quarantine guidance does. This guidance does not apply to adults. Educators and staff must adhere to the guidelines provided by Cal/OSHA.

**[Contact tracing](#) for individuals who were within 0-6 feet for more than 15 minutes over a 24-hour period indoors. These individuals that the positive case has been around during the two-day period prior to the start of symptoms (or two days before the positive COVID-19 specimen collection date) are close contacts and should follow the close contact protocol.

***Diagnostic tests are PCR or Antigen; home tests are not diagnostic tests.
